

The ANRT and the General Directorate of Information Systems Security (DGSSI) are organizing two training workshops from 23 to 26 October. The first is on Internet Digital Resource Management (INRM) and IPv6 in coordination with AFRINIC (African Register of IP Addresses). The second is DNSSEC and is conducted in collaboration with ICANN.

Around 60 people from administrations, operators and ".ma" service providers will benefit from these two modules which are moderated by international experts.
