

Growth of parks and and data consumption

Published on Morocco - National Telecommunications Regulatory Agency (https://www.anrt.ma)

The National Telecommunications Regulatory Agency publishes the observatories of the telecommunications sector at the end of December 2020. During this period, the sector has recorded a positive evolution in the parks of the different segments. This evolution is driven, throughout the year, by a sustained growth of the Internet park as well as data consumption in the fixed and mobile segments.
