

ANRT has just issued its decision ANRT / DG / N ° 03/19 of 14 March 2019 approving the first technical and tariff offer from Médi Telecom concerning its national roaming offer in areas covered by its mobile networks (2G / 3G / 4G) as part of the universal service. The offer (published on the operator's website) specifies the technical, operational and pricing terms applicable to the roaming service offered by Médi Telecom.

It is recalled that Itissalat Al-Maghrib's offer for national roaming as part of the universal service was approved (see Decision ANRT / DG / N ° 11/18 of 27 July 2018 and published in August 2018).
